## FEATURES

### + THE SCIENCE BEHIND STRENGTH AND LIGHTNESS

The Peli™ Air case has been designed to cut weight without compromising durability.

Our engineers have revolutionised the protector case by reducing structural waste while preserving Peli's legendary standards of strength. In development for years, the design team challenged the status quo to "add lightness" in every detail.

Here are some important reasons why Peli™ Air cases are both strong and light:

- Moulded from the next generation of Peli's lightweight HPX™ resin, a proprietary formula that rebounds without breaking
- Honeycomb structural elements that are actually stronger than solid polymer material
- Super-stiff "full box" sections engineered to create hollow parts

### + EXTREME ENGINEERING—UP TO 40% LIGHTER

Peli™ Air	Weight NF (kg)	Peli Equivalent	Weight NF (kg)	% var.
1485	2.1	1500	2.9	-26%
1525	2.7	1520	3.8	-28%
1535	3.9	1510	5.4	-28%
1555	3.3	1550	4.8	-35%
1605	4.2	1600	5.9	-33%
1615	6.4	1670	10.4	-40%

\* Case weights are actual and percentage variance is adjusted for interior volume.

### + UP TO THE TEST

It wouldn't be a Peli™ case if you couldn't drop it, kick it and run over it – and the Peli™ Air case is no different.

- Drop-tested on concrete with loads from 1,8 m on all sides and corners
- Submerged for 30 minutes at a depth of one meter
- Wheels are roll tested over 1 km with loads at 8 km/h
- 12,7 kg steel dart dropped on all sides from 1 m

### + SHARED FEATURES ACROSS ALL MODELS

- A Watertight O-Ring Gasket
- B New Style "Conic Curve" Lid Shape
- C Super-light Proprietary HPX2 Polymer
- D Stainless Steel Hasp Protectors
- E Proven Tough Double-Throw or Press & Pull Latches\*
